Objective

Seeking a Network Engineer position to leverage my comprehensive knowledge of networking protocols, hands-on experience with network design and configuration, and proven ability to ensure seamless connectivity and optimal performance. With a strong foundation in Cisco technologies and a passion for solving complex network challenges, I am dedicated to contributing to the design, implementation, and maintenance of robust and secure network infrastructures that drive organizational success and innovation.

Education

Course / Degree	School / University	Grade / Score	Year
Bsc.CSIT	Amrit science campus	Running	2019 - Present
Aws Certified Cloud Practitioner	Amazon Web Services (AWS)	Certified	2023
Cisco Certified Network Associates (CCNA)	Laba IT Training Institute	Graduate	2023

Certifications

Cisco Certified Network Associate Routing and Switching (CCNA) Graduate
Introduction to Cybersecurity
AWS Certified Cloud Practitioner
NDG LINUX ESSENTIALS
NDG LINUX UNHATCHED

Skills

Networking Protocols: TCP/IP, DHCP, DNS, SNMP, OSPF, EIGRP, BGP, VLANs, etc. Routing and Switching: Configuration and troubleshooting of Cisco routers and switches. Network Security: Firewall, VPN, Access Control Lists (ACLs), NAT/PAT. Wireless Networking: WLAN configuration and management. IP Addressing: IPv4 and IPv6 subnetting, addressing schemes. Network Troubleshooting: Analyzing and resolving network connectivity issues. Network Monitoring: Working with tools like Wireshark, SNMP monitoring systems, etc. Network Design: Basic understanding of network topology and design principles.

Cisco Devices: Routers, switches, access points, and other network equipment. Configuration: Setting up and managing Cisco hardware through CLI

Knowledge of VPCs, subnets, and basic networking within AWS.

Familiarity with core services like EC2, S3, RDS, Lambda, etc. Hands-on experience in provisioning and managing AWS services.

Fundamental understanding of cloud computing models (IaaS, PaaS, SaaS)
